Chant and **Meditation** are powerful ancient tools of everyday refinement and essential means of restoring and promoting physical, emotional, and spiritual balance by deepening awareness and nurturing the soul. The efficacy of these practices has in recent times become increasingly acknowledged and lauded by modern science, and continues to be a growing subfield of neurological research. The term **Qirtan** is Sanskrit, and implies a mantric call-and-response style of chanting, a weaving of phrases that acknowledge the gift of being here in this life and experiencing the bliss of

simply existing, absent all the external distractions that often blur our vision and our senses from what is good in this life. Jewish Shamanic practices of Qirtan are very ancient and intended to draw us into the ecstatic experience of the loving union of all beings with *Ey'ma Eela'a*, the Great Mother, the divine force that moves all existence into becoming, and that breathes aliveness into all stones, plants, animals and humans. The phrases and incantations of these chants are ancient and powerful, preserved for thousands of years in both Hebrew and Aramaic. The core gift of all three practices

lies in their magical capacity to free our spirits from impediments that inhibit our personal unfolding, and to re-awaken our longing for the embrace of the un-nameable, un-

definable and elusive Mystery who is all Love and who dwells within and beyond Creation.
